

Our Mission

YOUR POSITIVE PRINT

The hills, mesas and mountain peaks that make up our world have their own personalities, and leave their very own “print”. These natural formations absorb anything & everything that comes in contact with them. It is our mission to preserve our world, our landscapes, and our homes by passing our values onto the next generation – knowing with confidence that we can make a difference.

We must take an initiative to understand our daily impact on the land that we call our home & educate one another on the ways that we can minimize the negative impact that we are collectively contributing towards. *Can you create a greater positive impact than you already are?*

The surrounding mountains, lakes and rivers are so much more than a setting for our vacations, or even our day-to-day lives. The land that makes up our beautiful Earth has been leaving a print on our planet for millions of years. It is up to us to maintain & protect our home.

Educate yourself. Educate one another.

Reduce your carbon footprint and strive to leave *Your Positive Print*.

Together, we can make a difference.

“The Earth is what we all have in common.”

- Wendell Berry [American Novelist & Environmentalist]

If you're just starting to educate yourself on these matters, we welcome you!
Learn about your impact & begin your journey to create smaller carbon footprint.
